Jose Daniel Marchena Faerron Tutorial

Sección 1: Instalación de herramientas

Instalación del Visual Studio Code:

Instalación del *Lushay Code*:

Instalación del *Verilog-HDL/SystemVerilog :*

Instalación del OSS-Cad-Suite de YosysHQ:

Configuración de la extensión Lushay Code:

Configuración del Driver USB de Windows

Instalación de GNU-Make:

Sección 2. Uso del toolchain para diseño en FPGA

Clonación y ubicación del repositorio:

Inicializar la terminal del toolchain:

Comando Yosys y salida de Yosys:

```
PS C:\Users\Daniel Marchena\Desktop\Tutorial_parte_2> yosys

PS C:\Users\Daniel Marchena\Desktop\Tutorial_parte_2\open_source_fpga_environment\ejemplos\BlinkyLed\src\build>
```

Visualizar los diagramas de tiempo con GTKwave:

Para verificar la sintaxis y sintetizar los diseños RTL (make synth):

Para realizar el place and route del diseño sintetizado en la FPGA:

Para generar el bitstream y load que contiene el diseño:

```
"Generando blinky_led_tangnano9k.fs"
<frozen importlib._bootstrap>:219: Warning: Numpy built with MINGW-W64 on Windows 64 bits is experimental, and only available for
testing. You are advised not to use it for production.

CRASHES ARE TO BE EXPECTED - PLEASE REPORT THEM TO NUMPY DEVELOPERS
"COMPLETADO"
openFPGALoader -b tangnano9k blinky_led_tangnano9k.fs
Jtag frequency : requested 6.00MHz   -> real 6.00MHz

Sección 3

Creación de repositorio

Uso de commit:

Sección 4

Sección 5

Desing: creación de carpeta module_counter.sv:

```
module_counter.sv ●   module_counter_tb.sv U ●
src > design > module_counter.sv

module module_counter # (

    parameter COUNT =13500000

)(
    input logic clk,
    input logic rst,

    output logic [5 : 0] count_o
);

 localparam WIDTH_COUT = $clog2(COUNT);

 logic [WIDTH_COUT - 1 : 0]clk_counter='0;
 logic [5 : 0] led_countr_r;

 always_ff @(posedge clk) begin

    if(!rst)begin
        led_countr_r <= '0;
        clk_counter <= '0;
    end

    else if (clk_counter == COUNT - 1)begin
        clk_counter <= '0;
        led_countr_r <= led_countr_r + 1'b1;
    end

    else begin
        clk_counter <=  clk_counter + 1'b1;
        led_countr_r  <= led_countr_r;
    end

 end

 assign count_o= ~led_countr_r;
```

Sim: Creación de carapeta module_counter_tb.sv:

```
`timescale 1ns/1ps

module module_counter_tb;

logic clk;
logic rst;
logic [5 : 0]count_o;

module_counter # (10) COUNTER (
    .clk (clk),
    .rst (rst),
    ,count_o(count_o)

);

initial begin
    clk = 0;
    rst = 0;

    #30;

    rst = 0;

    #30;
    rst = 1;

    # 300000;
    $finish
end

always begin
    clk=~clk
    #10;
end

initial begin
    $dumpfile("module_counter_tb.vcd");
```

Constraints

PORT NAME	LOCATION	PORT OPTIONS
clk	52	Pull Up, LVCMOS33
